

The Advantages of Online Learning

- The scope and reach of online learning has the globe and beyond as it's classroom through the Internet! Other advantages include:
- Saves money - Fewer textbooks to buy, less driving or commuting to class, no paying for child care while you are away attending class.
- Saves time - Online Learning is ready when (and where) you are!
- Uses up to date content with real-life application.
- Allows you to integrate technology skills into your learning.
- Flexibility - Allows you to work and earn while you learn! Allows you to manage other obligations and manage your own time. Online Learning allows for the learner to determine where to spend the most time learning the topics.
- Networking with diverse people and resources around the world.
- Access to distance expertise - You're qualified instructor does not need to be geographically near you.
- Online interaction improves your reading, writing, and critical thinking skills.
- Online Learning promotes lifelong learning.
- Online Learning offers more individual attention with a direct line to your instructor and to other students. The instructor is much more available to the online learner.
- Learners interact with the instructor and fellow classmates much more often within the online classroom. Students can take time to think before responding and there is no face-to-face intimidation.
